

BC 2231 Silicone Gum in Volatile Silicone

Description

Basildon Chemicals BC 2231 is a blend of volatile silicone and silicone gum for use in car care preparations.

Product Features

1. Supplied in concentrate form.
2. Simple to use.
3. An easy and cost-effective method of using a silicone gum in automotive formulations.

Method of Use

BC 2231 is a concentrate which allows the addition of a silicone gum to a wide range of polishes and rinses. It can be further diluted in volatile silicone and is miscible with mineral oil.

Applications

BC 2231 can be used in trim cleaner and tyre care products.

- ◆ Smooth, velvety feel
- ◆ Increased substantivity to the above formulations
- ◆ Water resistance

Storage and Shelf Life

The product should be stored below 32°C and not allowed to freeze. Shelf life of the unopened container is 12 months from date of manufacture. If you wish to use the product after this time please contact us for approval.

Toxicity and Handling

See our health and safety sheet for more information.

Technical Service

Our technical and sales staff have considerable experience of the use of silicone products in a very wide variety of industries and the benefit of this experience is freely available to all our customers.
